July 2022 — Present

- Participated in the development of the eCampus web portal for education using HTML/CSS/JavaScript technologies
- Implemented the frontend for an educational web application with ReactJS
- Ensured optimization of applications for all screen sizes
- Worked closely with a team of designers and programmers to solve problems
- Used git version control system
- Learned about backend programming with .NET and Microsoft SQL

Projects

MojGib - presentation website

Introductory website for a company offering exercise classes. I **worked closely with their team** and adapted the design to their existing graphic identity. The project helped me to gain **communication** skills and improve my **design** skills.

BandWith - social network

A mobile app to showcase your music and meet other musicians. The project's main goals were to **gain experience** and improve at creating a **good user experience**. I also designed and implemented a presentation website for the app.
